Note: The total number of species cannot be directly obtained by adding the various State totals because many species occur in more than one State. Changes in numbers of threatened, endangered, or candidate species and estimated habitat are based on changes in listings by the U.S. Fish and Wildlife Service; more current data from recent investigations; further verification of a species' presence on public land; and clearance activities related to rights-of-way, oil and gas leases, mining permits, and other activities.

/a/ Includes recovery plans that have been prepared and approved, and that are in the process of being implemented. The total number of recovery plans cannot be obtained by adding State totals because a plan may cover more than one State. Last year's totals were based on Recovery Plans within administrative boundaries; this year's numbers are based on Recovery Plans being implemented.
