Subject: Soil Biological Communities AJust for Kids@Web Page

I am delighted to announce a new web page that has been posted by the National Science and Technology Center. Please take a minute and visit this informative page on the World Wide Web. <http://www.blm.gov/nstc/soil/Kids>.

This site is a great example of using technology to help others understand the importance and interdependence of all ecosystem parts. It can be a valuable resource in the Bureau's environment education program and outreach to the public, especially for the target audience of 4th - 6th grade school children. Every opportunity we have to share knowledge about the resources we manage is time well spent.

Congratulations to the authors and designers of this informative web page for a job well done: Bill Ypsilantis, Janine Koselak, Kathy Rohling, and Randy Hayes, National Science and Technology Center. If you have any suggestions or comments please, contact Bill Ypsilantis via E-mail at bill_ypsilantis@blm.gov.
