

FY02 T/E Species Expenditures and Special Status Species Information

Please provide funding information on **Threatened and Endangered Species Expenditures for FY02**. Please provide or update the BLM Sensitive Species list for your state. Follow the guidelines below and utilize the standardized format provided in Table E.

Guidelines for T/E Expenditures

- Only species on the list of Endangered, Threatened, and Candidate Wildlife and Plants (50 CFR Part 17) at the end of the Fiscal Year are to be reported. Expenditures made prior to the actual listing date of a species, but still within the same year, may be reported (e.g., costs of public meetings, notices, surveys, initial recovery efforts). Monies for unlisted, separate populations of listed vertebrates cannot be allowed into the report.
- Species should be identified by the same name as found in the most current list of species. Amounts above -2,000 need be only to nearest -500 or -1,000; smaller amounts may be to the nearest -100.
- In passing the amendment, Congress indicated that the requirement was aimed primary at expenses associated with the development and implementation of recovery plans for listed species. Thus, the main focus of the report should be funding of projects that are primarily to support the conservation of endangered or threatened species.
- Only reasonably identifiable expenditures for listed species will be totaled in this report. Extraordinary accounting to track monies expended on individual listed species are not expected.
- All habitat acquisition costs are to be reported separately from all other identifiable expenditures. Such acquisitions must be primarily for the purpose of conserving specific Federally listed species. As with other projects, those portions of habitat acquisition costs that are specifically for a listed species may be prorated out of the total acquisition costs when the other habitat is being acquired for other purposes (e.g., 25 acres of a 250-acre purchase will be set aside).
- Salary and benefits of an employee working full-time on a single species or whose time devoted to a particular species can be readily identified can be reported. Conversely, staff costs that are not assigned to work on particular species are not usually reportable.
- Any State or Federal project that incurs increased costs related directly to mitigation or other conservation efforts on behalf of Federally listed species can report that added cost.
- Examples of reportable expenditures that are directed to individual species include status surveys, habitat management or acquisition, research, propagation (including surrogate species), recovery plan development or implementation, and mitigation. The project must be to primarily benefit the listed species and not other conservation goals.
- Expenditures in a single project devoted to a number of listed species should be prorated.

- Monitoring and survey costs should be reported when: 1) The cost of the monitoring or survey was during the period the species was under a proposed listed and the species was actually listed in the same fiscal year that the monitoring and surveys were conducted; 2) The monitoring or survey covered both candidates and listed species and the cost can be prorated to include only the listed species; and 3) Monitoring or surveys costs of listed species should be included when they readily identifiable to a single species.

FY02 T/E Species Expenditures and Special Status Species Information

(State lists from FY01 are posted on the intranet <http://web.blm.gov/internal/wo-200/wo-230/datacall.htm>
 Use the following table to provide a list of special status species that appear on BLM managed land. Only provide expenditures for Federally listed and proposed species.

Table E

Special Status Species					
Common Name	Scientific Name	Status	Federally Proposed or Designated Critical Habitat (if yes, give approximate BLM acreage)	Expenditures (-000's)	
				Total Cost	Land Acquisition 1/
Federally Listed
